PJ ADJEI-PREMPEH

Cloud & IT Support Professional | AWS | Linux | Automation | Networking

Fort Lauderdale, FL | 703-369-6860 | pprempeh@gmail.com
LinkedIn: linkedin.com/in/pj-adjei-prempeh-402212255 | GitHub: github.com/pprempeh-ui/pj-cloud-portfolio

PROFESSIONAL SUMMARY

Cloud and IT support professional with hands-on experience in AWS services, Linux administration, automation, troubleshooting, networking, and end-user support. Experienced deploying cloud-based solutions using Amazon S3, CloudFront, EC2 concepts, GitHub Actions CI/CD automation, and scalable AWS architecture projects. Strong communicator with customer service experience and AWS/CompTIA certifications.

CERTIFICATIONS

AWS Certified Cloud Practitioner | CompTIA A+ | CompTIA Network+ | CompTIA Security+

TECHNICAL SKILLS

AWS: S3, CloudFront, IAM, EC2 Foundations, Auto Scaling, Elastic Load Balancer, RDS, Route 53
Automation & CI/CD: GitHub Actions
Operating Systems: Linux, Windows Server
Networking: DNS, HTTP/S, Load Balancing, Virtual Networks
Tools: Git, GitHub

PROJECT EXPERIENCE

DealDrop AWS Architecture Project | GitHub

- Designed and presented a scalable AWS e-commerce architecture capable of handling traffic spikes from 2,000 to 60,000 users.
- Implemented AWS services including Amazon EC2, Auto Scaling Groups, Elastic Load Balancer, Amazon RDS, ElastiCache Redis, CloudFront, and Route 53.
- Improved scalability, fault tolerance, and performance using automated scaling, load balancing, and caching strategies.
- Documented architecture decisions and AWS integrations through GitHub project documentation.
- GitHub: https://github.com/pprempeh-ui/dealdrop-aws-architecture

AWS Cloud Portfolio

- Built and deployed a live cloud portfolio website using Amazon S3 private origin and CloudFront CDN.
- Configured secure IAM access and implemented GitHub Actions CI/CD automation.
- Troubleshot and resolved IAM permissions, AccessDenied errors, cache invalidation issues, and CloudFront distribution configuration problems.
- Live Site: https://d192ivfc2s4l4d.cloudfront.net

Azure Traffic Management Project

- Designed and deployed Azure Load Balancer and Application Gateway solutions to distribute and route web traffic across multiple virtual machines.
- Implemented Layer 4 load balancing, Layer 7 path-based routing, backend health monitoring, and ARM template deployments.

PROFESSIONAL EXPERIENCE

IT Junior Network and System Administrator | Black Cards of History Inc | May 2024–May 2025

- Configured network devices, troubleshot systems, supported users, and improved reliability and security.

Instructional Designer | Zen AI, Inc. | Jan 2024–May 2024

- Performed testing, resolved technical issues, and maintained websites.

EDUCATION

Bachelor of Applied Science (BAS), Information Technology
Network Systems Analyst Specialization | Cum Laude
Broward College | Graduated May 2026
